

Sample Network Diagrams

These are sample diagrams to help you get started on building a diagram of your own credit card processing environment. Having a diagram satisfies requirement 1.1.2 (a) of the PCI DSS. These illustrations are examples only and are not all inclusive of components that may be in your cardholder data environment. You must successfully investigate and identify all pieces of your environment to ensure proper security is in place.

Basic Non-Integrated IP Terminal (PHYSICAL STORE)

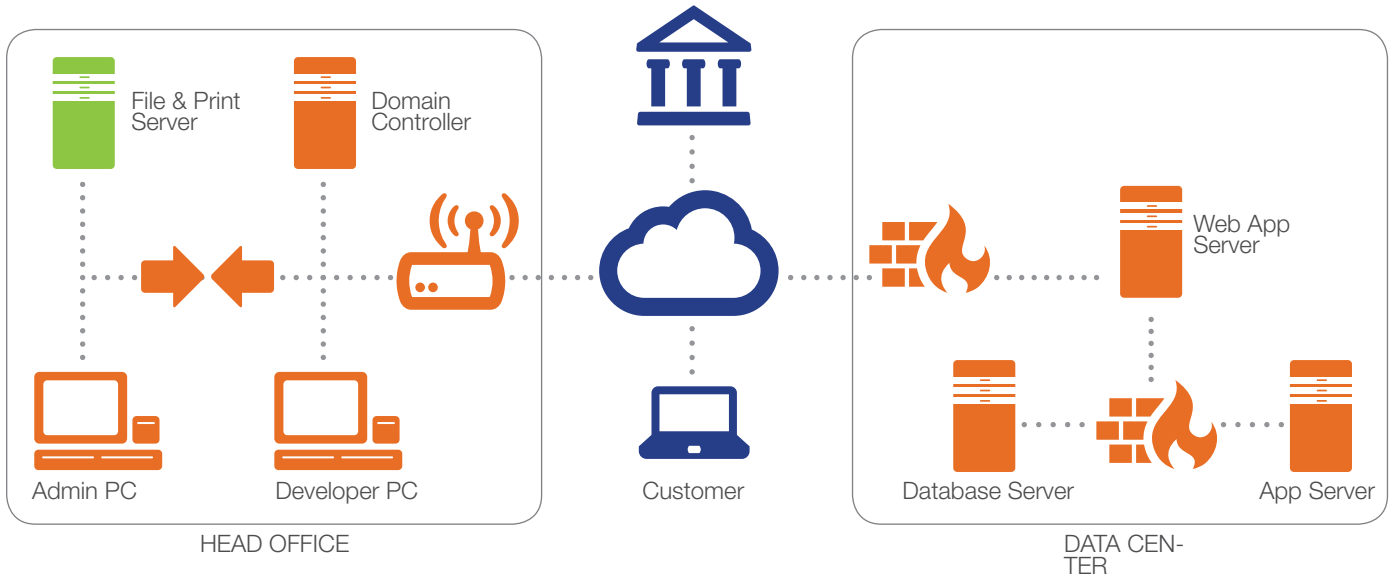

Basic Integrated Point-of-Sale (Brick and Mortar)

Basic Ecommerce Retailer

Note: There must be no systems in the head office that store/process/transmit card data for this diagram to be accurate.

Basic Integrated Point-of-Sale (Restaurant)

Note: The router/firewall must be configured to block traffic between VLAN 1 and VLAN 2 for this diagram to be accurate.
